WLAN
Campus WLAN at the Hochschule Hannover (HsH)

The following Wi-Fi-access is available at the Hochschule Hannover:

eduroam
It will be accessible in any location within the network environment of your mobile device.

Eduroam enables registered users to access WLAN networks in their own as well as in other academic institutions. To that end, Eduroam is embedded into corresponding European projects, which aim to enable transparent, cross-border use of all research networks (see www.eduroam.org).

Eduroam offers secure 802.1X authentication and WPA2 encryption and is supported by the majority of mobile devices.

Information on Eduroam is available at:
https://de.wikipedia.org/wiki/Eduroam
